Multiple Linear Regression Viewpoints

A Publication sponsored by the
American Educational Research Association's
Special Interest Group on Multiple Linear Regression

MLRV

Volume 20 • Number 1 • Spring 1993

Table of Contents

General

Equations Which Include the Reliability of the Dependent Variable for Estimating the Power of a Two Group ANOVA Design p. 1
Dale Shaw, University of Northern Colorado, Rebecca Kopriva, & Susan Tracz, both of California State University-Fresno

Using Multiple Regression to Determine the Number of Factors to Retain in Factor Analysis p. 5
Keith K. Zoski & Stephen G. Jurs, both of University of Toledo

Multiple Linear Regression Techniques in Assessing the Effects of Truncation on the Gamma Distribution p. 10
Gannat R. M. El-Daian, Al-Azhar University for Girls, Egypt, Samuel R. Houston, & Robert L. Heiny, both of University of Northern Colorado

Teaching

Some Nonstandard Applications of the Analysis of Covariance Model p. 20
John T. Pohlman, Southern Illinois University

Teaching Ordinal and Criterion Scaling in Multiple Regression p. 25
Randall E. Schumacker, University of North Texas, & John D. Williams, University of North Dakota

SIG/Multiple Linear Regression News

1993 SIG/MLR Program at the AERA Annual Meeting p. 32
